GRC'S versatility enables it to use in different ways in the construction and decoration of building walls. In its simplest form, GRC renders reinforced with alkali resistant glass fibres can be used on a variety of substrates to provide a durable and decorative finish. They may be applied over external insulation as part of a system to upgrade the thermal characteristics of the wall, directly on to block work or masonry, or into metal lath. In all cases the glass fibre reinforcement gives a long-lasting and crack free performance.

A part from the GRC Designing undertakes production of beautiful garden furniture, Landscaping products and decor like Counters chairs etc....

Al Majd fiber Glass Industry LLC have great pleasure introduce ourselves, as pioneer in the field of GRP,GRC, GRG Designers &Manufactures in wide range of products.
